Summary

Unvaxxed Sperm ([\\$nuBTC](#)) is a community project that aims to provide a platform for those who support health freedom, oppose government mandates, and seek a space to challenge the current COVID-19 fear-mongering and totalitarianism.

For this purpose, we have created a cryptocurrency on the BSC (Binance Smart Chain) network as a statement, standing for personal freedom and bodily autonomy despite the widespread throwing away of such values in the face of the so-called COVID-19 pandemic.

Our plans include social media alternatives for dissidents, a blockchain ledger of PhD research into mRNA 'vaccine' effects, alternative treatments such as Ivermectin, and other memory-holed information, as well as making buying in easier - ETH and fiat bridges are planned.

Philosophy

Unvaxxed Sperm ([\\$nuBTC](#)) is a community where everyone can feel safe and free to pose questions and challenge the current narrative, from lockdowns which damage businesses and cause depression and suicides to mRNA vaccine mandates which can kill or cause permanent injury.

We stand against this mass hysteria – the shaming and demonisation of unvaccinated people (e.g. 'anti-vaxxers', 'covidiot'), the trivialization of the serious side effects of the COVID 'vaccines', the lack of transparent data, the forcing of experimental 'vaccines' on adults and children, and the belief that life as we know it must end because of a disease with a 99.8% survival rate.

[\\$nuBTC](#) is a statement, that through its decentralised platform cannot be silenced. As our marketcap grows, so does the reach of our message.

Welcome to the resistance.

Tokenomics

The Unvaxed Sperm (**\$nuBTC**) cryptocurrency contract was created 22 November 2021 on Binance Smart Chain as a SafeMoon fork with an initial supply of 1 trillion coins (1,000,000,000,000). The contract was revoked, ownership renounced and **\$nuBTC** is therefore purely a community project.

The 6.9% liquidity tax on sell transactions protects the price from sell-offs and ensures the token will remain tradeable forever.

\$nuBTC token can be purchased via [PancakeSwap](#) with a plan to build a BSC-ETH bridge to reach out to Ethereum network investors in the future.
